SUMMARY

Full Stack Developer with 1+ year of experience building scalable Angular and .NET Web API applications, including systems supporting 1,000+ daily user interactions. Skilled in designing real-time architectures, optimizing REST API performance (improved response time by 20%), and implementing secure authentication systems.

SKILLS

Frontend : Angular, Next.js, TypeScript, HTML/CSS

Backend : .NET Web API, C#

Databases : MySQL, SSMS

Tools & Platforms : Git, Azure, Supabase

AI Tools : ChatGPT, Openclaw

EXPERIENCE

Pizone Infotech

Software Developer

March 2025 – Present

India

- **Engineered 5+ Angular frontend modules** integrated with .NET Web APIs, supporting enterprise-level application workflows
- Developed and optimized **10+ RESTful APIs**, enabling real-time communication for **1,000+ daily user interactions**
- **Improved API response time by 20%** through efficient query handling and reduction of redundant requests
- Diagnosed and resolved **15+ production issues**, improving system stability and **reducing downtime by 30%**
- Collaborated with a cross-functional team of 4–6 developers and designers, **improving delivery timelines by 25%**
- Conducted **20+ code reviews**, ensuring adherence to clean architecture and scalable coding standards

PROJECTS

Orbit – Visual File Manager | Angular, .NET, Supabase

[Live Demo](#)

- Architected a **graph-based file system** handling **1,000+ file nodes**, modeling an orbit-style hierarchy to visually represent directory structure and **reduce complexity by 30%**
- Integrated secure authentication and access control using **Supabase** for 100+ users, with real-time file updates at **sub-second latency**
- Designed a responsive UI for mobile, tablet, and desktop platforms

Flex Schema – Enterprise Resource Management System | Angular, .NET Core, SQL

- Built and integrated **50+ RESTful APIs** using **Angular** and **.NET Core Web API** for hospital and organizational management systems
- Wrote and optimized **thousands of SQL queries** to repair corrupted data and improve database reliability
- Implemented middleware, custom attributes, and backend validation for secure, maintainable APIs, resolving business-logic and data-consistency issues in production

EDUCATION

Maharaja Ganga Singh University

Master of Computer Science (M.Sc.)

March 2025 – Present

Bikaner, Rajasthan, India

Maharaja Ganga Singh University

Bachelor of Computer Applications (BCA)

March 2022 – March 2025

Bikaner, Rajasthan, India
