

PRABHJOT KHALWANIA

Full Stack Developer

India | +91 6375157148 | prabh.khalwania@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Full Stack Developer with **1+ year of experience** building scalable Angular and .NET Web API applications, including systems handling **1000+ daily user interactions**. Skilled in designing real-time architectures, optimizing API performance (improved response time by **20%**), and implementing secure authentication systems. Passionate about developing efficient, user-focused solutions with clean and maintainable code.

EXPERIENCE

Pizone Infotech – Software Developer

March 2025 – Present

- Engineered **5+ Angular frontend modules** integrated with .NET Web APIs, supporting enterprise-level application workflows
- Implemented and optimized **10+ RESTful APIs**, enabling real-time communication for **1000+ daily user interactions**
- Accelerated API response time by **20%** through efficient query handling and reduced redundant requests
- Diagnosed and fixed **15+ production issues**, improving system stability and reducing downtime by **30%**
- Collaborated with **4–6 developers and designers**, improving development efficiency and delivery timelines by **25%**
- Conducted **20+ code reviews**, ensuring adherence to clean architecture and scalable coding standards

SKILLS

- **Frontend:** Angular | Next.js | TypeScript
- **Backend:** .NET Web API | C#
- **Databases:** MySQL | SSMS
- **AI :** Openclaw | ChatGpt
- **Tools :** Git | Azure | Supabase

PROJECTS

Orbit - A Visual File Manager

Live on - <https://orbit-api-rcpu.onrender.com/>

- Built to solve limitations of traditional file systems by improving navigation efficiency and reducing complexity by **30%**
- Architected a graph-based file system handling **1000+ file nodes and relationships**
- Modeled orbit-style hierarchy to visually represent directory structure and improve usability
- Integrated secure authentication and access control using Supabase for **100+ users**
- Enabled real-time file updates with **<1 second latency**, ensuring seamless user interaction
- Designed responsive UI for **mobile, tablet, and desktop platforms**

Flex Schema – Enterprise Resource Management System

- Built and integrated 50+ RESTful APIs for complex UI and business workflows
- Developed enterprise-level modules using Angular and .NET Core Web API for hospital and organizational management systems
- Wrote and optimized thousands of SQL queries to fix corrupted data and improve database reliability
- Implemented middleware, custom attributes, and backend validations for secure and maintainable APIs
- Solved medium-to-advanced production issues related to business logic, performance, and data consistency

EDUCATION

Bachelor of Computer Applications (BCA)

March 2022 – March 2025

Maharaja Ganga Singh University |

Masters of Computer Science (M.Sc)

March 2025 – Present

Maharaja Ganga Singh University | 2025 - Present
